DATA AGGREGATION UPDATE

CHANGES IN RULES TO REFLECT MULTI-LOCATION + REMOTE JOB POSTINGS

Gartner TalentNeuron, the source for the NC TECH IT Job Trends data, has updated how they aggregate job posting data. Beginning September 2022, TalentNeuron has enhanced their business rules to combine multi-location job ads. From their website:

> Jobs can be posted to one or many locations and for different location types (E.g. New York City, United States, or simply "Remote"). This type of posting method has become more common in the wake of the Remote/Hybrid hiring surge, causing noise in job volume. TalentNeuron previously counted each location listed in a posting as a unique job posting. In September 2022, we will update our business rules to adapt to these emerging market trends.

The data aggregation changes were applied to all four years' of data accessible on the platform. They shared in some cases, users may notice a decrease in overall job counts in the platform, which is evident with this report of August 2022 NC IT Job Trends data.

For full information, visit About the Data: Job Postings Aggregation Updates on the TalentNeuron website.

RESEARCH UNDERWRITERS

With the support of underwriters, NC TECH commissions + releases research on the state's tech sector for the benefit of our members, and as a resource for policy makers, economic development leaders, and the media. Thank you to the 2022 Research Underwriters. For more information about becoming a Research Underwriter, visit nctech.org/research and select the Underwriter's Menu button.
