MONTHLY HIGHLIGHT

CLOSING NC'S DIGITAL DIVIDE

The NC Department of Information Technology, Division of Broadband and Digital Equity is working to bridge the digital access and connectivity gap across North Carolina. This plan recognizes that equitable access to reliable internet services is crucial for economic growth, education, healthcare, and overall quality of life. The plan expands broadband infrastructure by investing in fiber optic networks, wireless technologies, and satellite-based solutions. It emphasizes the need to prioritize underserved areas including rural and low-income communities by collaborating with Internet service providers, local governments, and other stakeholders to affordable and fast access to the Internet.

Tech jobs continue to be in demand, and improved internet access for individuals and businesses in the state will allow an expanded, more diverse range of North Carolina talent for employment opportunities, enhanced collaboration and networking, and expanded access to digital training and education. A win for both companies and residents.
